Q2 - Marketplace Builder Hackathon 2025 Day 4

Dynamic Card Functionality

- Implemented dynamic product cards with real-time data fetching.
- Each card includes a product image, name, price, and an "Add to Cart" button.

Add to Cart Feature

- Enabled users to add products to the cart with a single click.
- Incorporated the ability to adjust the quantity of products directly within the cart interface.
- Displayed dynamic price updates based on the selected quantity.

Checkout Process

- Developed a seamless checkout system:
 - Users review their cart items.
 - Confirm the total amount.
 - Submit the order for processing.

Final Touch - Thank You Message

- After a successful checkout, displayed a **Thank You** message to confirm the order completion.
- Enhanced user experience by providing a clear and interactive feedback loop.
